Art Unit: 3206

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 14-16,19 and 34-36 drawn to an apparatus for forming a protective film on a surface of a large-sized product, classified in class 118, subclass 72.
- II. Claims 20 and 22-33, drawn to a method of forming a protective film on a large product, classified in class 29, subclass 458.
- 2. The inventions are distinct, each from the other because:
- 3. Inventions of Group I and of Group II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the method as claimed can be practice by another and materially different apparatus, such as an apparatus including means for assembling an engine and functional parts to the paint-finished product.
- 4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the ant as shown by their different classifications restriction for examination purposes as indicated is proper.
